NATURAL COSMETICS

PERFUME LINE  
CATALOGUE

*For the love of perfume...*

*TIME CANNOT BE STOPPED,  
BUT YOU CAN SLOW DOWN ITS THE EFFECTS*

The perfume line is a line of cosmetic products inspired by carefully selected perfumes - coming all the corners of the world.

This line will provide you with everything you need to care for, nourish and regenerate your skin. In addition, you will be in the company of unique and lasting fragrances all day long.

The perfume line consists of cosmetic products, among which you can choose your perfect one.

**Extremely feminine:** brave Rose Madame, Sweet Bloom, Olimp Fire and Night Fever, extraordinary Be Beauty, Good Life, Sensual Girl, Raspberry Kiss, Black Dream, and also **these for the gentlemen:** Who's the boss and Action for Men.

APIS NATURAL COSMETICS is a family company that has been producing multifunctional cosmetics for face and body care for over 30 years.

The founder of the company is biotechnologist Krystyna Arcabowicz, passionate about cosmetology, whose main goal is the highest quality of the products and the pursuit of perfection.

The technologies in APIS NATURAL COSMETICS are developed from scratch and combine the best natural ingredients with the latest advances in biotechnology and cosmetology.

We are the first Polish company to produce and market cosmetic products with Dead Sea minerals. We have our own microbiological, technological and physicochemical laboratories.

We work in accordance with the requirements of ISO 22716 GMP (Good Manufacturing Practices). In order to confirm the highest quality of our products, we obtained the TÜV Rheinland GMP ISO 22716 mark in 2016.

In the search for innovative solutions in the field of biochemistry, biotechnology and biology, APIS NATURAL COSMETICS closely cooperates with scientific and research institutes. Constantly expanding the scope of research conducted by experienced dermatologists, biologists and cosmetologists confirms the high effectiveness of cosmetics. Systematic tests of cosmetics allow us to maintain their quality at the highest level.

Striving for perfection in the field of beauty and care, we are constantly looking for new achievements in biotechnology. The result is the introduction of new lines of professional cosmetic products intended for SPA salons, schools and cosmetic wholesalers. These products include make-up removers, exfoliation, scrubs, algae and cream masks, concentrates, creams, body balms and cosmetic accessories.

Meeting our clients' expectations, we conduct trainings, the advantage of which is the transfer of theoretical and practical knowledge by our cosmetologists. After completing the training, the participants are prepared to perform treatments based on our products in a professional manner, receiving a certificate confirming gaining new qualifications.

Respect for nature, the latest scientific achievements and passion are the basis of our work. Our greatest pleasure is the recognition of the customers who have been with us for many years and use our products, appreciating their importance for beauty.

*„Our passion is beauty and nature is our inspiration”*
